KEY TO THE REGISTER.

1947-48.

EXPLANATIONS OF RECORDS IN THE REGISTER BOOK.

(All abbreviations employed in the Register Book are explained in the alphabetical key, see page xlii.)

Steamers & Motorships, columns 2 & 3; Sailing Vessels, columns 3 & 4.

Decks. See illustrations of types of vessels in Appendix. Explanations of such terms as *Shade dk.*, &c., are included in the alphabetical key, see pages xlii and xlv.

As from 1st July, 1934, the form of the notation of decks has been altered.

Where no record of decks appears it is to be assumed that the vessel has only one continuous deck.

Special Surveys. Explanations of records of special periodical surveys will be found in the alphabetical key, see page xliv. The records only certify to the vessel's state of efficiency *at the time of survey.*

Ports of Survey. The contractions (such as Lon., Syd., &c.), used to denote the ports at which vessels have been surveyed, are explained on page xlvii.

Material, Rig, &c. Unless otherwise stated, all steamers and motorships are of steel construction and propelled by a single screw. Explanations of contractions used to denote the rigs of vessels will be found in the alphabetical key, see pages xlii to xlv.

Late Names. The figures following a late name of a vessel indicate the year in which the change of name took place.

Sailing Vessels, columns 3 & 4.

Master. The figures which follow the master's name, thus, *Smith* 30–40, indicate the dates of his appointment (1) as master in the service of the present owner of the vessel, and (2) as master of the vessel herself.

Steamers & Motorships, column 4; Sailing Vessels, column 5

Tonnage. The tonnage recorded in the Register Book in type like that shown at the side hereof is, with a few exceptions, the official registered tonnage measured according to the law of the country to which the vessel belongs.

3101 (Gross)
2864 (Under dk.)
1994 (Net)

For some foreign vessels, the tonnage which is recorded has been measured in accordance with British rules and is accepted under British law. In such cases, the fact is indicated by the use of italic figures, thus:—

3101 (Gross)
2864 (Under dk.)
1994 (Net)

Note 1.—Remeasurement of tonnage alterations was not always carried out during the War, so that amendment of certain tonnages, bulkhead notations, &c., particularly in those cases in which tonnage openings were closed, is not complete. Remeasurement, however, has been recommenced.

Note 2.—The record "*Tonnage opening closed* (*W.E.*)" indicates that the tonnage opening was closed and additional draught assigned as a War Emergency measure. When, however, a thin red line appears through the letters *W.E.* it signifies that the vessel has now reverted to her original draught but facilities for re-opening and/or remeasurement for tonnage are not yet available.

Note 3.—When tonnage figures are overprinted with thin red lines it indicates that these figures are no longer correct owing to the opening or closing of tonnage openings, and that the amended tonnage figures have not been received. (Discontinued during the War, See Notes 1 and 2.).

Steamers & Motorships, columns 5, 6 & 7; Sailing Vessels, columns 6, 7 & 8.

Symbols of Classification of Lloyd's Register.

100A1........ } Characters of vessels built of Iron or Steel according to
90A1 .... } Rules of the Society since 1869. The numerals 100, 90, &c., do not signify terms of years, but the standard of classification.

A1..............This character (without a numeral prefixed) is assigned to Iron or Steel vessels built for special purposes or trades, to the satisfaction of the Committee.

A1..............Character of Wood or Composite vessels of the first class well and sufficiently equipped. The figures in column 5 (Steamers and Motorships), column 6 (Sailing Vessels), prefixed to the character indicate the term of years for which the vessel is at present classed, thus:—11A1, Cont 6A1, Rest 6A1. (See notes in alphabetical key, pages xlii to xlv under "Cont" and "Rest."). The figures in column 7 (Steamers and Motorships), column 8 (Sailing Vessels), indicate the expired terms of years originally assigned, if on the first line, and assigned on continuation if on lower lines.

A1 ....Character of wood vessels which have passed the period assigned on original Survey, or Continuation, or Restoration, and of vessels not having an original character, which are found to be fit to carry dry and perishable goods. The term of years for which this character is assigned appears under the class in column 5 (Steamers and Motorships), column 6 (Sailing Vessels), thus:— SSPly.47–6yrs.

1..................The figure 1 included with the characters, as printed above, signifies that the vessel has equipment in accordance with the requirements of the Society's Rules.

The letters *a*, *a*†, *a**, *b*, *b*†, *b**, &c., printed in black in column 7 (Steamers and Motorships), column 8 (Sailing Vessels) indicate the Equipment Letter determined by the Rules.

The letters *a*, *a*†, *b*, *b*†, &c., in the same columns, are those employed to determine the fees for Special Surveys on the hull, and are not to be used to ascertain the equipment from the Rules. Where no red letter is shown, the Equipment Letter is to be used for determining Special Survey fees.

Fees for Machinery Special Surveys are based on the Machinery Numeral (MN) given in column 13.

The figures 1¼, 2¼, &c., under the equipment letter, indicate the sizes of chain cables specially supplied or approved, which are not in accordance with the size corresponding to the Equipment Letter.

– ....This sign placed after a character, in the position usually occupied by the figure 1, indicates that the equipment of the vessel—either as regards its quality or its quantity—does not fulfil the requirements of the Society's Rules.

✠................This sign denotes that the vessel has been built under Special Survey.

✠................This sign denotes that the engines or the boilers, or both (according to the record which follows), have been built under Special Survey.

—— 6,47 ....A black line, with date underneath, indicates that the vessel's character was expunged from the Register Book at the date specified because on account of reported defects the vessel was not entitled to retain her classification.

—— 6,47 ....A red line, with date underneath, indicates that the vessel's character was expunged from the Register Book at the date specified because, on account of non-compliance with the Society's Rules as regards surveys, the vessel was not entitled to retain her classification.

... 6,47 ....This sign, recorded with date in column 5 (Steamers and Motorships) and column 6 (Sailing Vessels), indicates that the vessel's class was withdrawn from the Register Book at the Owner's request at the date specified.

Examined 6.47 Indicates that as a War Emergency measure, a general examination was held at that date, at the port indicated in red in column 6, in lieu of the overdue special periodical survey. The period of validity of such notation is 12 months, unless otherwise specified.

Examined LR 6,47 Indicates that the vessel, which was classed in another Register, has been surveyed for maintenance by the Society's Surveyors at that date. The period of validity of such notation is 12 months, unless otherwise specified.

~~100A1~~ ....When a posting of loss, condemnation, casualty, &c., is made against a classed vessel, the character is expunged in this manner.

with freeboard This notation under the character signifies that the freeboard assigned is a condition of the vessel's class.

Awng dk., Shade dk., Shelter dk., &c. See illustrations of types of vessels in Appendix. Explanations of such terms as shade deck, awning deck, shelter deck, &c., are included in the alphabetical key to the abbreviations, see pages xlii to xlv.

Ref.Mchy. (*See separate section*) Indicates that the vessel holds the Society's Certificate for her refrigerating machinery and appliances, full details of which will be found in the List of Refrigerated Vessels.

Symbols of Classification of the late Underwriters' Registry.

(Amalgamated with Lloyd's Register in 1885.)

A1* A1*... Characters of Iron, Steel, or Composite vessels built
A1, A1, according to the Rules of the Underwriters' Registry.

Vessels classed in red were built under the inspection of the Surveyors to the Underwriters' Registry.

The figure 1 affixed to Symbols of Classification signifies the Character of Equipment.

Date of Survey. The figures under a character denote the date of the last reported examination in dry dock.

Ports of Survey. An explanation of contractions used to indicate surveying ports will be found on page xlvii.

A port of survey printed in black signifies the port of the last dry docking. When printed in red it is the port at which a general examination has been held as recorded.

When the ports at which the last dry docking and general examination coincide, the port recorded in red stands for both surveys.

The 6th, 7th, and 8th columns (Sailing Vessels), or 5th, 6th, and 7th columns (Steamers & Motorships) left blank, indicate that the vessel has never been classed in the Register Book.

When the 6th (Sailing Vessels) or 5th (Steamers) column is left blank, except as regards the date of survey last recorded, it indicates that the character has expired, or that it has been withdrawn in default of survey or on account of non-payment of fees due.

Steamers & Motorships, column 7*.

Date when the Tail Shaft was last seen. The letter N preceding the date of last survey of the tail shaft (thus N 6,47) indicates that the tail shaft had not been used prior to that date. The letters P and S indicate respectively the last survey of *port* and *starboard* shafts.

Continuous Liners. The letters CL in this column denote that the shaft is fitted with a continuous liner throughout the length of the stern tube, and apply to the shaft or shafts whose survey dates appear beneath.

Oil Gland. The letters OG denote that the shaft is fitted with an approved oil-retaining gland at the after end of the stern bush and apply to the shaft or shafts whose survey dates appear beneath.

Steamers & Motorships, column 8; Sailing Vessels, column 9.

Date of Build. In the case of Iron and Steel vessels classed by Lloyd's Register, the date of build recorded in the Register Book is in accordance with the Rules. For vessels not classed by Lloyd's Register, it is not possible to define whether the date of build is the date of launch or the date of completion.

In cases in which new vessels are laid up on completion and not commissioned for some time afterwards, or in which their fitting out after launching is, for any reason, unduly prolonged, the entry in column 8 denotes their date of launch and their date of commissioning. In the case of vessels built to Lloyd's Register classification, the Rules specify an inspection of hull and machinery at the commissioning date for assignment of this split record, and on satisfactory compliance therewith, the next Periodical Special Survey dates from the "Commissioned" date.

Records such as 18^{65}_{94} occur in the case of some unclassed vessels. These denote that the vessel was originally built at the date indicated by the upper figures, and is reported to have been rebuilt at the date indicated by the lower figures. In such cases, the Society has no authoritative information as to the extent to which the reported rebuilding has been carried out.

Steamers & Motorships, column 10; Sailing Vessels, column 12.

Owners. In the case of vessels of British Registration, the name recorded in the Register Book is that of the Managing Owner, or of the firm in which the Managing Owner is a partner. When there is not a Managing Owner appointed, the name of the largest shareholder is recorded; and the name of the Manager of the vessel is also noted if desired. In the case of colonial or foreign vessels, however, obvious difficulties render it impossible to ensure that a person entered as Managing Owner is in every instance a legal owner. He may sometimes be only the *Manager* of a vessel as distinguished from Managing *Owner*.

Steamers & Motorships, column 11; Sailing Vessels, column 13.

Dimensions. Length. The Registered dimensions of vessels in these columns are recorded in feet and tenths of a foot.

When two lengths are recorded thus: $\frac{315{\cdot}3}{304{\cdot}0}$ the upper figures denote the length according to the Official Register of the vessel, and the lower figures according to British practice.

In the cases of classed vessels the over-all length is also recorded as and when measured by the Society's Surveyors and is indicated by the letters O.L. in parentheses, thus :—325·5(O.L.). In the cases of Italian and Finnish vessels the registered length is to be regarded as an over-all length except where recent changes of flag have taken place and the new registered dimensions are not yet available.

Breadth. When two breadths are recorded thus: $\frac{50{\cdot}9}{53{\cdot}2}$ the upper figures denote the breadth according to the Official Register of the vessel, and the lower figures the extreme breadth to outside of plating. In the cases of some steamers of small tonnage, mostly of the coasting type, the extreme breadth over belting is recorded in italics thus: *25·4*.

Depth. When two depths are recorded thus: $\frac{17{\cdot}9}{25{\cdot}7}$ the upper figures denote the depth according to the Official Register of the vessel, and the lower, the depth in hold from the uppermost continuous deck. In some countries the registered depth is the same as the moulded depth.

Deck Erections. See illustrations of types of vessels in Appendix.

Water Ballast. See explanations and illustrations on page xlvi of key.

Steamers & Motorships, column 12; Sailing Vessels, column 14.

Port of Registry. The Port of Registry is shown in Roman type, while a port recorded in italics will be the vessel's Home Port, as distinct from the Port of Registry.

Steamers & Motorships, column 13.

All contractions used in relation to Engines, Boilers, Furnaces, &c., are explained in the alphabetical key, see pages xlii to xlv.

Machinery Numeral MN

STEAM RECIPROCATING ENGINES.—The following rule is to be used for determining the Machinery Numeral (MN) of Steam Reciprocating Engines, viz.:—

$$\text{MN} = \frac{\text{P} + 340}{1000}\left(\frac{\text{ND}^2\sqrt{\text{S}}}{100} + \frac{\text{H}}{15}\right) \text{ where the boiler pressure is below 160lb.}$$

$$= \frac{\text{P} + 590}{1500}\left(\frac{\text{ND}^2\sqrt{\text{S}}}{100} + \frac{\text{H}}{15}\right) \text{ where the boiler pressure is 160lb or above.}$$

If the boilers are fitted with Forced Draught or Induced Draught appliances

then $\frac{\text{H}}{12}$ is taken instead of $\frac{\text{H}}{15}$,

where D = diameter of L.P. Cylinder in inches.
S = stroke in inches.
H = heating surface in square feet.
P = working pressure in lb per square inch.
N = number of L.P. cylinders.

The square feet of heating surface represented by H will comprise the total surface of those parts of the boiler exposed to heat so as to cause evaporation, superheaters and 50 per cent of economisers.

STEAM TURBINES.—For determining the Machinery Numeral of Steam Turbine Engines $\frac{\text{SHP}}{6}$ is to be substituted in the above formulæ for $\frac{\text{ND}^2\sqrt{\text{S}}}{100}$, where S.H.P. is the Total Shaft Horse-Power.

HEAVY OIL ENGINES.—The following rule is to be used for determining the Machinery Numeral of Heavy Oil Engines, viz.:—

$$\text{MN} = \frac{\text{C} \times \text{N} \times \text{D}^2}{\frac{\text{S}}{\text{D}} + 50}$$

where MN = the Machinery Numeral.
N = the number of power cylinders.
D = the diameter of the power cylinders in inches.
S = the stroke of the piston in inches. In the case of the opposed piston type of Engines S is half the combined stroke of the pistons and is the combined stroke for exhaust piston type.
C = 5 for Engines of the 4 S.C.SA type.
= 10 for Engines of the 4 S.C.DA type.
= 9 for Engines of the 2 S.C.SA type.
= 18 for Engines of the 2 S.C.DA type.
= 16 for Engines of the 2 S.C.SA opposed piston type.
= 12 for Engines of the 2 S.C.SA type having piston exhaust valves of the same diameter as that of the main pistons.
= 24 for Engines of the 2 S.C.DA type having piston exhaust valves of the same diameter as that of the main pistons.

Where the Mean Indicated Pressure of 4 stroke engines exceeds 90 lb. per square inch, and where the Mean Indicated Pressure of 2 stroke engines exceeds 85 lb. per square inch, the Machinery Numeral obtained by the above formula is to be increased in the proportion of M.I.P. to 90 lb. per square inch and 85 lb. per square inch respectively.

PETROL AND PARAFFIN ENGINES.—The following rule is to be used for determining the Machinery Numeral of Petrol and Paraffin Engines, viz.:—

$$\text{MN} = \frac{\text{B.H.P.}}{3{\cdot}5} \text{ where B.H.P. is the Brake Horse Power at full power.}$$

Registered Horse Power RHP This note shows that the horse power given is the horse power as recorded in the Official Register in the case of British vessels.

Boiler pressures. The working pressures of all main and auxiliary boilers are indicated in Roman Characters; those of donkey boilers in italics; thus 200 lb. (main or auxiliary) *100 lb.* (donkey)." C.B. followed by a pressure in italics indicates the working pressure of Caustic Boilers.

Where a donkey or auxiliary boiler is out of use but is still on board, this fact is indicated by the record in column 13 being ruled through with a thin red line.

Geared Turbine Engines. The letters SR denote that Single Reduction Gear is fitted between the main engines and screw shafting.
The letters DR denote that Double Reduction Gear is fitted between the main engines and screw shafting.

Oil and Gas Engines.	4S.C. denotes 4-stroke cycle.	SA denotes single acting.
	2S.C. denotes 2-stroke cycle.	DA denotes double acting.

Steamers & Motorships, col. 14 ; Sailing Vessels, col. 15.

Moulded Depth. The moulded depth of an Iron or Steel vessel is the perpendicular depth taken from the top of the upper deck beam at side, at the middle of the length of the vessel, to the top of the keel and the bottom of the frame at the middle line. In Wooden and Composite vessels the moulded depth is the perpendicular depth from the top of the upper deck beam at the side of the vessel amidships to the lower edge of the rabbet of the keel.
In Wooden and Composite vessels where the lower part of the midship transverse section is of a hollow character (as in cases where thick garboard strakes are fitted) the moulded depth is measured from the point where the line of the flat of the bottom cuts the keel. Fractions of an inch are not recorded.

Draught. The "corresponding draught" for all cases recorded prior to August, 1923, is the calculated *mean* draught of water from bottom of keel to centre of load line disc and fractions of an inch are not recorded. Subsequent to that date the actual draught to the nearest quarter of an inch, as supplied by the respective Shipbuilders, is recorded.

TABLE EXPLICATIVE CONCERNANT LE REGISTRE.

1947-48.

EXPLICATIONS DES ANNOTATIONS DU "LLOYD'S REGISTER BOOK".

(Toutes les abréviations du "Lloyd's Register Book" se trouvent expliquées dans la Table Explicative, voir page li.)

Navires à Vapeur et à Moteurs, colonnes 2 et 3; Navires à Voiles, colonnes 3 et 4.

Ponts. Voir les dessins des différents types de navires dans l'Appendice (Vol. II). Les explications des termes tels que *shade dk.*, etc., sont fournies dans la Table Explicative, voir pages li à liv.

A partir du 1er Juillet 1934, des changements ont été apportés aux annotations concernant les ponts.

Lorsqu'il n'est pas fait mention de ponts, il y a lieu d'assumer que le navire n'a qu'un seul pont continu.

Visites Périodiques. L'explication de l'enregistrement des visites spéciales périodiques se trouve dans la Table Explicative, voir page liii. L'enregistrement indique seulement la condition du navire à l'époque de la visite.

Ports de Visite. Les abréviations telles que (Lon., Syd., &c.), employées pour indiquer les ports où les navires ont été inspectés, sont expliquées à la page lvi.

Matériaux, Gréement, etc. Sauf avis contraire, tous les vapeurs et navires à moteurs sont construits en acier et propulsés par une seule hélice. Les abréviations employées pour spécifier le gréement des navires sont expliquées dans la Table Explicative, voir pages li à liv.

Anciens Noms. Les chiffres à la suite d'un ancien nom de navire indiquent l'année pendant laquelle le changement de nom a eu lieu.

Navires à Voiles, colonnes 3 et 4.

Capitaine. Les chiffres à la suite du nom du capitaine, ainsi, *Smith* 30–40, indiquent (1°) l'année où il est entré comme capitaine au service de l'armateur, (2°) l'année où il a pris le commandement du navire.

Navires à Vapeur et à Moteurs, colonne 4; Navires à Voiles, colonne 5.

Tonnage. Le tonnage qui figure sur le "Lloyd's Register Book" en caractères comme ci-contre, est à part quelques rares exceptions, le tonnage officiel mesuré d'après les lois du pays auquel le navire appartient.

3101 (Total)
2864 (Sous le pont)
1994 (Net)

Pour quelques navires étrangers, le tonnage qui figure a été mesuré d'après la méthode Anglaise, et est reconnu par la loi Anglaise. Dans ce cas le fait est mentionné par l'emploi de caractères italiques, comme ci-contre.

3101 (Total)
2864 (Sous le pont)
1994 (Net)

NOTE 1.—Le mesurage des modifications de jauge ne fut pas toujours effectué régulièrement pendant la guerre, en sorte que la rectification de certaines jauges, détails de cloisons, &c., se trouve remise, tout particulièrement lorsqu'une ouverture pratiquée dans le pont supérieur en vue d'obtenir une reduction de jauge a été refermée. Néanmoins, le mesurage des modifications de jauge a recommencé.

NOTE 2.—La mention "*Tonnage opening closed* (*W.E.*)" (Ouverture de pont refermée) indique que l'ouverture pratiquée dans le pont supérieur en vue d'une réduction de la jauge a été refermée et qu'une augmentation du tirant d'eau a été autorisée en tant que mesure provisoire de guerre. Cependant, lorsque les lettres *W.E.* sont rayées d'un trait rouge fin, cela signifie que le navire possède de nouveau son tirant d'eau originel, mais qu'une occasion de réouvrir l'ouverture, ou de rejauger le navire, ne s'est pas encore présentée.

NOTE 3.—Un trait rouge fin à travers les chiffres de jauge signifie que ces chiffres ne sont plus corrects du fait qu'une ouverture de pont a été pratiquée ou refermée et que les nouveaux chiffres de jauge n'ont pas été reçus. (En suspens pendant la guerre, voir Note 1.)

Navires à Vapeur et à Moteurs, colonnes 5, 6 et 7; Navires à Voiles, colonnes 6, 7 et 8.

Marques de Classification du Lloyd's Register.

100A1 .... / 90A1 .... Cotes des navires en fer ou en acier, construits conformément aux règlements de la Société depuis 1869. Les nombres 100, 90, &c., n'indiquent pas une période d'années, mais le type de classification.

A1................Cette cote non précédée d'un nombre, s'applique aux navires en fer ou en acier, construits à la satisfaction du Comité pour des usages ou des voyages spéciaux.

A1................Première cote des navires en bois ou composites dont l'armement est bon et suffisant. Les chiffres qui précèdent la cote, colonne 5 (navires à vapeur et à moteurs), colonne 6 (navires à voiles), indiquent le nombre d'années pour lesquelles le navire a été coté, ainsi :—11A1, Cont 6A1, Rest 6A1. (Voir "Cont" et "Rest" dans la Table Explicative, pages li à liv). Les chiffres dans la colonne 7 (navires à vapeur et à moteurs), colonne 8 (navires à voiles), indiquent les périodes expirées pour lesquelles les navires avaient été cotés. A la première ligne ces chiffres indiquent la période originelle, aux lignes suivantes les périodes de continuation.

A1................Cotes des navires en bois pour lesquels les périodes assignées soit originellement, soit par Continuation ou par Restauration sont expirées, ou cote des navires qui n'ont jamais eu de cote originelle mais qui sont jugés aptes à transporter des marchandises sèches et périssables. Le nombre d'années pour lesquelles la cote a été assignée figure sous la cote dans la colonne 5 (navires à vapeur et à moteurs), colonne 6 (navires à voiles), ainsi :—
SSPly.47–6yrs.

1....................Le chiffre 1 imprimé comme ci-contre et faisant partie de la cote, indique que le navire a un armement conforme aux exigences de la Société.

Les lettres *a*, *a*†, *a**, *b*, *b*†, *b**, etc., en noir dans le colonne 7 (navires à vapeur et à moteurs), colonne 8 (navires à voiles), indiquent la lettre d'armement d'après les règlements.

Les lettres *a*, *a*†, *b*, *b*†, etc., en rouge, dans les mêmes colonnes, servent à déterminer les honoraires pour les visites périodiques de coque, et ne doivent pas être utilisées en vue d'établir l'armement conformément aux règlements Lorsqu'il n'y a pas de lettre rouge, la lettre d'armement sert à déterminer les honoraires de visites périodiques.

Les honoraires pour visites périodiques de machines sont calculés d'après le nombre de la machine (MN) qui figure dans la colonne 13.

Les chiffres 1⅞, 2¼, etc., au-dessous de la lettre d'armement, indiquent la grandeur de câble-chaîne spécialement fournie ou approuvée et non-conforme à la grandeur correspondant à la lettre d'armement.

—	Ce signe à la suite d'une cote, à la place occupée par le chiffre 1, indique que l'armement du navire ne repond pas aux exigences des règlements de la Société, soit comme qualité, soit comme quantité.
✠	Ce signe indique que le navire a été construit sous surveillance spéciale.
✠	Ce signe indique que les machines ou les chaudières, ou toutes les deux (suivant l'annotation dont il est suivi) ont été construites sous surveillance spéciale.
— 6,47	Une ligne noire avec date au-dessous, indique que la cote du navire a été retirée du "Lloyd's Register Book," le navire ne pouvant conserver sa cote par suite de défectuosités signalées.
— 6,47	Une ligne rouge avec date au-dessous, indique que la cote du navire a été retirée du "Lloyd's Register Book," le navire ne pouvant conserver sa cote par suite de dérogation aux règlements de la Société en ce qui concerne les visites.
... 6,47	Ce signe, inséré avec date dans la colonne 7 (navires à vapeur et à moteurs) et colonne 8 (navires à voiles), indique que la cote du navire a été retirée du "Lloyd's Register Book" à la demande de l'armateur à la date indiquée.
Examined 6,47	Signifie, qu'en tant que mesure provisoire de guerre, une inspection générale a eu lieu à cette date, au port indiqué en rouge dans la colonne 6, en remplacement de la visite périodique spéciale échue. La période de validité de cette inspection est de 12 mois, sauf mention contraire.
Examined LR 6,47	Signifie que le navire, qui était coté auprès d'un autre Registre, a été soumis à une visite d'entretien par les Inspecteurs de la Société à la date indiquée. La période de validité d'une telle annotation est de 12 mois, à moins de mention contraire.
~~100A1~~	Quand un navire coté est mentionné comme perdu, condamné ou ayant tout autre accident, &c., la cote est rayée comme ci-contre.
with freeboard....	Cette mention sous la cote indique que le franc-bord assigné est une condition de la cote du navire.
Awng dk., *Shade dk.,* *Shelter dk., &c.*	Voir les dessins des différents types de navires dans l'Appendice. Les explications des termes tels que shade deck, awning deck, shelter deck, &c., sont données dans la Table Explicative, voir pages li à liv.
Ref.Mchy. *(See separate section)*	Signifie que le navire possède le Certificat de la Société pour les machines et installations frigorifiques, dont les détails figurent sur la Liste des navires pourvus de machines frigorifiques.

Marques de Classification de l'ex Underwriters' Registry.

(Réuni avec le Lloyd's Register en 1885.)

A1* A1,	A1* A1,	Cotes des navires en fer, en acier ou composites, construits conformément aux règlements de l'Underwriters' Registry.
		Les navires cotés en rouge ont été construits sous la surveillance des Inspecteurs de l'Underwriters' Registry. Le chiffre 1 à la suite des marques de classification indique la cote de l'armement.

Date de Visite.	Les chiffres sous une cote indiquent la date de dernière visite en cale sèche connue.
Ports de Visites.	Les abréviations employées pour indiquer les ports de visites sont expliqués à la page lvi. Un port de visite imprimé en noir indique le port de la dernière visite en cale sèche. Quand il est imprimé en rouge, il s'agit du port auquel une inspection générale a été effectuée, comme mentionné. Lorsque la dernière visite en cale sèche a eu lieu dans les mêmes ports que l'inspection générale, le port imprimé en rouge se réfère aux deux visites. Les 6me, 7me, et 8me colonnes (navires à voiles) ou les 5me, 6me, et 7me colonnes (navires à vapeur et à moteurs) laissées en blanc, indiquent que le navire n'a jamais été coté dans le "Lloyd's Register Book." La 6me colonne (navires à voiles) ou la 5me colonne (navires à vapeur) laissée en blanc, sauf en ce qui concerne l'époque de la dernière visite enregistrée, indique que la cote est expirée ou bien qu'elle a été rayée à défaut de visite ou par suite du non-paiement des honoraires dûs.

Navires à Vapeur et à Moteurs, colonne 7*.

Date de la dernière Visite de l'arbre porte-hélice.	La lettre N précèdant la date de la dernière visite de l'arbre port-hélice (par example N 6,47) signifie que l'arbre port-hélice n'avait pas été utilisé avant la date indiquée. Les lettres P & S serviront à désigner respectivement les arbres porte-hélice de *Bâbord* et de *Tribord*.
Chemises continues.	Les lettres CL dans cette colonne indiquent que l'arbre est pourvu d'une chemise continue sur toute la longueur du tube d'étambot, et concernent le ou les arbres dont les dates d'inspection figurent au-dessous.
Presse-garnitures à huile.	Les lettres OG indiquent que l'arbre est muni, à la partie arrière du tube d'étambot, d'un presse-garnitures agrée pour retenir l'huile, et concernent le ou les arbres dont les dates d'inspection figurent au-dessous.

Navires à Vapeur et à Moteurs, colonne 8 ;
Navires à Voiles, colonne 9.

Date de Construction.	Dans le cas des navires en fer et en acier classés au LLOYD'S REGISTER, la date de construction inscrite dans le Registre est conforme aux Règlements. Pour les navires non cotés par le Lloyd's Register, il n'est pas possible de spécifier si la date de construction est celle du lancement ou celle de l'achèvement des travaux. Lorsque des navires neufs ne sont pas mis en service immédiatement, ou lorsque leur achèvement après leur lancement se trouve, pour une raison quelconque, excessivement retardé, les renseignements de la colonne 8 indiquent la date de leur lancement, ainsi que la date de leur mise en service. Comme condition d'une telle annotation les Règlements stipulent, pour les navires construits en vue d'être classés au Registre du Lloyd, une inspection de la coque et des machines à la date de leur mise en service, et lorsque les exigences de cette inspection ont été remplies, la date des Inspections Périodiques Spéciales est calculée à partir de la date de mise en service. Des annotations telles que 18^{65}_{94} figurent pour quelques navires non cotés. Les chiffres supérieurs indiquent alors la date originelle de la construction, les chiffres inférieurs la date à laquelle le navire a été rapporte comme reconstruit. Dan ce cas la Société ne peut spécifier l'importance de la reconstruction.

Navires à Vapeur et à Moteurs, colonne 10 ;
Navires à Voiles, colonne 12.

Armateurs.	Pour les navires de la Grande Bretagne et de l'Irlande, le nom qui figure sur le "Lloyd's Register Book" est celui de l'armateur-gérant ou celui de la Société dont l'armateur-gérant fait partie. Lorsqu'il n'y a pas d'armateur-gérant, le nom qui figure est celui du plus gros actionnaire et le nom du gérant figure aussi, si on le demande. Pour les navires coloniaux et étrangers, de sérieuses difficultés empêchent de certifier qu'une personne mentionnée comme étant armateur-gérant est, dans chaque cas, l'armateur légal. Dans certains cas la personne dont le nom figure peut n'être que *gérant*, ce qui est absolument distinct *d'armateur-gérant*.
Dimensions.	Les dimensions de douane des Navires, dans ces colonnes sont indiquées en pieds et en dixièmes de pieds.

Navires à Vapeur et à Moteurs, colonne 11 ;
Navires à Voiles, colonne 13.

Longueur.	Lorsque deux longueurs sont mentionnées, ainsi $\frac{315\cdot3}{304\cdot0}$, les chiffres supérieurs indiquent la longueur d'après le Registre officiel national du navire et les chiffres inférieurs la longueur d'après la pratique anglaise. Dans le cas des navires classés, la longueur hors tout est aussi mentionnée, quand et comme mesurée par les Inspecteurs du Lloyd's Register, et est indiquée par les lettres O.L. entre parenthèses, ainsi 325·5(O.L.). Dans le cas des navires italiens et finlandais, la longueur de douane est à considérer comme une longueur hors tout, sauf lorsqu'un récent changement de nationalité a eu lieu et que les nouvelles dimensions de douane ne sont pas encore connues.
Largeur.	Lorsque deux largeurs sont mentionnées, ainsi $\frac{50\cdot9}{53\cdot2}$, les chiffres supérieurs indiquent la largeur d'après le Registre officiel national du navire et les chiffres inférieurs la largeur extrème allant jusqu' au côté extérieur du borde. Dans le cas de quelques vapeurs de jauge peu importante et principalement de cabotage, la largeur extrème, y. compris la ceinture, est mentionnée en italique comme suit : *25·4*
Creux.	Lorsque deux creux sont mentionnés, ainsi $\frac{17\cdot9}{25\cdot7}$, les chiffres supérieurs indiquent le creux d'après le Registre officiel national du navire et les chiffres inférieurs le creux dans la cale depuis le pont continu supérieur. Dans quelques pays, le creux du Registre est le même que le creux sur quille.
Constructions sur les Ponts.	Voir les dessins des différents types de navires dans l'Appendice.
Water Ballast.	Voir explications et dessins à la page lvi de la Table Explicative.

Navires à Vapeur et à Moteurs, colonne 12 ;
Navires à Voiles, colonne 14.

Port d'Armement.	Le Port d'Armement est indiqué en caractères romains, fondis qu'un port inséré en italique est un port d'attache, en tant que différent du port d'armement.

Navires à Vapeur et à Moteurs, colonne 13.

Toutes les abréviations employées se rapportant aux Machines, Chaudières, Foyers, &c., sont décrites dans la Table Explicative, voir pages xlvii à l.

"Nombre" de la machine MN

MACHINES A VAPEUR ALTERNATIVES.—La formule suivante sert au calcul du "Nombre" (MN) des machines à vapeur alternatives, à savoir :—

$$MN = \frac{P + 23.9}{70.3}\left(\frac{ND^2\sqrt{S}}{1028} + 0{,}72\,H\right)$$ pressions au-dessous de 11.25 kgs. par centimètre carré.

$$= \frac{P + 41{,}5}{105{,}5}\left(\frac{ND^2\sqrt{S}}{1028} + 0{,}72\,H\right)$$ pressions de 11.25 kgs. et au-dessus

Pour les chaudières à tirage forcé, ou à tirage induit, on doit substituer 0.90 H à 0,72 H dans les formules précédentes.

Dans ces formules D = diamètre en centimètres du cylinder B.P.
S = course du piston en centimètres.
H = surface de chauffe en mètres carrés.
P = pression de régime en Kgs. par centimètres carrés.
N = Nombre de cylindres Basse pression.

La surface de chauffe représentée par H comprend la surface de toutes les parties de la chaudière exposées à la chaleur de manière à produire l'évaporation de l'eau, les surchauffeurs, ainsi que 50 pour cent des économiseurs.

TURBINES A VAPEUR.—Pour calculer le "Nombre" des turbines à vapeur, il y a lieu de substituer $\frac{SHP}{6}$ (SHP étant la puissance totale sur l'arbre) à $\frac{ND^2\sqrt{S}}{1028}$ dans les formules ci-dessus.

MOTEURS A HUILES LOURDES.—La formule suivante doit être employée pour calculer le "Nombre" des moteurs à huiles lourdes :—

$$MN = \frac{C \times N \times D^2}{\frac{S}{D} + 50}$$

où MN = "Nombre" du moteur.
N = nombre de cylindres.
D = diamètre des cylindres en millimètres.
S = course des pistons en millimètres; dans le cas de moteurs du type à pistons opposés, S est la moitié de la course totale des pistons; pour le type à pistons d'échappement, c'est la course totale.
C = 0,00775 pour les moteurs à 4 temps, simple effet.
= 0,0155 pour les moteurs à 4 temps, simple effet.
= 0,0140 pour les moteurs à 2 temps, simple effet.
= 0,0280 pour les moteurs à 2 temps, double effet.
= 0,0248 pour les moteurs à 2 temps, simple effet, à pistons opposés.
= 0,0186 pour les moteurs à 2 temps, simple effet, ayant des pistons d'échappement du même diamètre que les pistons principaux.
= 0,0372 pour les moteurs à 2 temps, double effet, ayant des pistons d'échappement du même diamètre que les pistons principaux.

Lorsque la pression indiquée moyenne d'un moteur à 4 temps est supérieure à 6,3 Kgs. par centimètre carré, et celle d'un moteur à 2 temps est supérieure à 6 Kgs. par centimètre carré, le "Nombre" donné par la formule ci-dessus doit être majoré dans le rapport de la pression indiquée moyenne (M.I.P.) à 6,3 Kgs. par centimètre carré et 6,0 Kgs. par centimètre carré, respectivement.

MOTEURS A ESSENCE OU A PETROLE.—La formule suivante doit être utilisée pour le calcul du "Nombre" des moteurs à essences ou à petrole, à savoir :—

$MN = \frac{BHP}{3.5}$ où BHP est la puissance au frein en plein rendement.

Force Officielle en Chevaux RHP — Cette annotation indique la force en chevaux d'aprés le Registre Officiel du navire, dans le cas de navires britanniques.

Pressions des Chaudières. Les pressions de travail de toutes les chaudières principales et auxiliaires sont indiquées en caractères romains; celles des chaudières de petit cheval en italique, ainsi : 200lb. (principales et auxiliaires); *100 lb.* (de petit cheval). C.B. suivi de la pression en italique, dénote la pression de travail des chaudières à soude caustique.

Lorsqu'une chaudière de petit cheval se trouve hors de service, bien que toujours à bord, le fait est indiqué en rayant les caractéristiques de la colonne 13 au moyen d'un trait rouge.

Turbines à Engrenages. Les lettres SR indiquent qu'un engrenage à simple réduction est installé entre les machines principales et l'arbre port-hélice.
Les lettres DR indiquent qu'un engrenage à double réduction est installé entre les machines principales et l'arbre port-hélice.

Moteurs à huiles lourdes et à gaz.

4S.C. indique Cycle à 4 temps. SA indique simple effet.
2S.C. indique Cycle à 2 temps. DA indique double effet.

Navires à Vapeur et à Moteurs, colonne 14 ; Navires à Voiles, colonne 15.

Creux sur quille. Le creux sur quille pour les navires en fer et en acier, est la longueur de la perpendiculaire abaissée depuis la face supérieure des barrots du pont supérieur sur le coté et au milieu de la longueur du navire, jusqu'à hauteur de la rencontre de la face inférieure de la membrure avec le dessus de la quille sur la ligne médiane. Pour les navires en bois et composites, le creux sur quille est la longueur de la perpendiculaire abaisée depuis la face supérieure des barrots du pont supérieur jusque'à hauteur de l'arête inférieure de la rablure de quille. Pour les navires en bois et composites dont les parties inférieures sont frégatées (lorsqu'un navire est pourvu par exemple de galbords épais) le creux sur quille n'est alors calculé que jusqu'à hauteur de l'intersection de la ligne prolongée des fonds avec la quille. Les fractions d'un pouce ne sont pas mentionnées.

Tirant d'eau. Le "tirant d'eau correspondant," pour tous le cas mentionnés avant août, 1923 est le tirant d'eau moyen calculé depuis le fond de la quille jusqu'au centre du disque de la ligne de charge; et les fractions de pouce ne sont pas mentionnées. Après cette date, le tirant d'eau actuel, au quart de pouce le plus voisin, et tel qu'il a été indiqué par les constructeurs de navire, est mentionné.

Navires à Vapeur et à Moteurs, colonne 15 : Navires à Voiles, colonne 16.

Pour l'explication des marques employées pour indiquer les différents Registres auxquels un navire est coté (s'il n'est pas coté au Lloyd's Register), voir Table Explicative pages li à liv.

Certificat à passagers, délivré par le "Ministry of Transport." Cette annotation "MT till 6,47" indique que le certificat expire à la date mentionnée, Juin, 1947.

***Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The *Date of Survey* of a ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving *Notice of Periodical Surveys* required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

*** Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The *Date of Survey* of a ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving *Notice of Periodical Surveys* required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

*** Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The *Date of Survey* of a ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving *Notice of Periodical Surveys* required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.
